Product & Quantity Standards

Several styles will be delayed for Spring '25 D1. They have been identified with a red dot in the VMGs. To ensure the visual merchandising setup remains cohesive and impactful, we've outlined practical tips to guide replacement options and maintain display integrity.

TIPS TO MAINTAIN VISUAL MERCHANDISING INTEGRITY FOR SPRING '25 D1:

1. PRIORITIZE REPLACEMENT WITH CLASSICS:

- Use Classic Polos and Tees as the first replacement option for delayed styles.

2. DOUBLE-UP WHEN NEEDED:

- If Classics are running low, double up an item from the same capsule to fill gaps.

3. STAY WITHIN THE COLOR PALETTE:

- If doubling is not feasible, replace with a full-price item from the same color palette in a different capsule.

4. OPTIMIZE FOLDING TECHNIQUES:

- Use larger folds for current products to occupy more table space.

5. INCORPORATE ACCESSORIES:

- Fill empty spaces on display tables or shelves with trays of smaller accessories.
- Leverage larger items such as hip bags, backpacks, or duffles to maintain a balanced and appealing upper wall display if needed.
